

Hana Tarek

Frontend Developer | React & Django

✉ hanatarek319@gmail.com ☎ 01002609273  LinkedIn  GitHub  Behance

PROFILE

React Frontend Developer and Computer Science graduate from Ain Shams University with experience building production-ready web applications using React, Django, REST APIs, PostgreSQL, and Supabase. Teaching Assistant at GUC with experience delivering programming instruction and collaborating on real-world software projects. Passionate about creating scalable, user-centered applications.

EDUCATION

Bachelor's of Computer Science, Ain Shams University 09/2020 – 07/2024

- Computer Science graduate from Ain Shams University, specialized in Software Engineering with a GPA of 3.8.

TECHNICAL SKILLS

Frontend Technologies React, Angular, JavaScript, HTML, CSS, Tailwind	Backend Technologies Python, Django, REST APIs
Programming Languages Java, Python, JavaScript, SQL	Databases MySQL, PostgreSQL, MongoDB, Supabase
Tools & Platforms Git, GitHub, Postman, Figma, Netlify, Vercel	

LANGUAGES

Arabic Native	English IELTS 6.5
-------------------------	-----------------------------

PROJECTS

ADHD Awareness Website, Freelance project 02/2026 – 04/2026

- Designed the UI/UX in Figma and developed the website using React.
- Implemented an interactive ADHD screening quiz.
- Used Supabase to store quiz results and Resend for weekly reports.
- Deployed the website using Netlify.

MentorHub, National Bank of Egypt (NBE). 09/2025 – 10/2025

- Collaborated in a team project to develop a mentorship website for NBE bank.
- Worked on the React frontend and integrated the frontend with the Django backend using RESTful APIs.

Event Ticketing Platform, Database Architecture & Optimization 06/2025 – 07/2025

- Designed and implemented the database architecture using PostgreSQL.
- Developed relationships between tables to ensure data integrity and scalability.
- Optimized database performance through normalization, indexing, and query efficiency improvements.

Tazkarty Website • Collaborated in a team project to build a full-stack platform using Django and React. • Implemented dynamic event browsing and ticket booking features. • Used Django Authentication for user registration and login functionality.	04/2025 – 04/2025
CareGiver App, graduation project • Android application designed to support elderly users by addressing medication non-adherence and loneliness. • Developed an AI-powered healthcare assistant using NLP and Large Language Models (LLMs) to support medication adherence and reduce loneliness among elderly users.	06/2024 – 06/2024
Recipe and Meal Planning Website • Created an Angular-based web app with user authentication, recipe management, social features, meal planning, and shopping list generation.	05/2023 – 05/2023

WORK EXPERIENCE

Teaching Assistant, German University in Cairo (GUC) • Delivered weekly programming tutorials and lab sessions to 30+ Computer Science students. • Guided students in Java and python programming, debugging, algorithms, and object-oriented design.	09/2024 – 02/2026
---	-------------------

TRAINING & CERTIFICATIONS

React - The Complete Guide (incl. Next.js, Redux) Course, Udemy • Focused on modern frontend development with React • Learned React components, hooks, state management, and routing. • State management using Redux • Routing with React Router • Full-stack development using Next.js	02/2026 – Present
UI/UX Web Design in Figma 2026 AI & Big ProjectsCompleted an intensive web, Udemy • Learned UI/UX design using Figma • Applied responsive design principles • Improved workflow using components and design systems • Used advanced Figma tools to increase speed and efficiency	03/2026 – 04/2026
Digital Egypt Builders Initiative (DEBI) • Completed an intensive web development training program covering frontend and backend development • Gained experience working with REST APIs and database management • Built hands-on projects using modern web technologies • build a project in collaboration with NBE bank	10/2024 – 09/2025

Awards

3rd Place — Dell AI Empower Egypt Hackathon, Dell Technologies • Competed in a national AI hackathon focused on food waste management. • Collaborated with a team to design and develop an AI-powered prototype within 5 hours • demonstrating strong problem-solving, teamwork, and rapid prototyping skills.	08/2024
